**Biomass Fuel Co., Ltd.**

Our company, BIOMASS FUEL VIET NAM CO., LTD. (BMFV), acquired ISO9001: 2015 and ISO14001: 2015 certifications, which are international standards for quality and environmental management systems, on December 7.

ISO9001: 2015 has established a systematic quality control system and has been making efforts toward acquisition with the aim of reflecting it in the production of high-quality wood pellets. BMFV will continue to actively maintain and improve quality management and deliver high-quality products that customers can rest assured.

In addition, ISO14001: 2015 aims to appropriately manage the environmental load of our corporate activities and continuously reduce it, and to acquire it in order to achieve both sustainable growth and conservation of the global environment. We have been working on it. In particular, we will use this management system to properly evaluate GHG emissions and control emissions in the process from raw material procurement to manufacturing and shipping of wood pellets, and deliver products with low environmental impact.

As our handling volume of biomass fuels such as wood pellets and PKS is expanding, we will discuss the legality, sustainability, traceability, quality management, and environmental management of each fuel procurement, manufacturing, processing, and transportation process. Obtaining each certification, such as examination by an appropriate third-party certification body and implementation of management, is positioned as part of efforts to promote a sustainable biomass fuel supply business. Going forward, we will continue to strive to develop businesses that take the global environment and local communities into consideration through such efforts to ensure sustainability.
